

Entry-level to Mid-level Landscape Architect – Ann Arbor

InSite Design Studio

Established in 1994, InSite Design Studio, Inc. is a woman-owned landscape architecture firm that serves public, recreational, commercial, institutional and residential clients. InSite Design actively pursues ecologically sensitive, innovative landscape architectural design through ongoing consideration of hydrologic, topographic and vegetative systems. Environmental sensitivity is at the core of our design process; from the early stages of inventory and analysis through construction and ongoing management. Our firm strives to restore ecological function to every project site, regardless of size or scope, while maintaining high aesthetic standards. We are looking for a hardworking and talented designer that shares our ecological values and passion for landscape architecture. InSite offers full benefits and practices a working environment that promotes work/life balance.

Experience required: 0-5 years

Education required: Bachelor or master's degree in landscape architecture

Position description:

Being a small firm, InSite offers a unique opportunity for team members to be involved in a wide variety of projects and responsibilities. We expect candidates to be comfortable with all phases of design – site inventory and analysis, conceptual design and design development, construction documentation, and construction administration. An ideal candidate will have a background in Michigan ecology and native plants, a passion for green infrastructure, strong analytical thinking and organizational skills. Candidates are expected to have strong communication skills and should enjoy learning and collaborating in a team environment. Skillful hand and computer graphic capabilities are highly desired.
